

SHAWNEELAND DRIVEWAY PERMIT SPECIFICATIONS

All private driveways shall be designed to serve one or two individual lots on a Shawneeland trail. All private driveways should be designed and constructed as shown in figure 9. Entrance radius should be 20' except in high density areas where a 12' radius can be allowed. All driveway pipe culverts will be sized to accommodate the run off expected from a 10-year frequency storm.

All driveway grades shall start back of the shoulder line. If drainage is necessary, the ditch line may be move back to provide 9 inches (min.) cover over pipe. Driveways shall be at least 12 ft. wide and shall be tied into the roadway smoothly. The driveway entrance surface shall extend from the edge of the roadway to the right of way line. Driveway surface can be crusher run aggregate or paved.
